

Townsville City Council

**BUILDERS, SUBCONTRACTORS,
FOREMAN & OTHER RELATED TRADES**

Half Day Soil Erosion & Sediment Control Course 2005

In conjunction with the Accredited 5 Day Soil Erosion and Sediment Control Planning Course, Townsville City Council will also be hosting a half day Soil Erosion and Sediment Control Course designed specifically for those working on the ground on building sites, housing development and private building sites. The course aims to raise awareness and improve understanding of soil erosion and sediment control on building sites.

Summary of Course Content:

- Short review of legal aspects relating to soil erosion and sediment control
- Erosion and Sediment Control requirements of site establishment
- Preparing a site for soil erosion and pollution control
- Review of Erosion and Sediment Control issues associated with different soil types
- Review of Drainage Control measures
- Review of Erosion Control measures
- Review of Sediment control measures

The course is being held on **Wednesday 9 November 2005 from 8am – 12pm** at the Townsville Plaza Hotel with a light morning tea included.

The cooperation of building contractors in soil erosion and sediment control is essential to the protection of our environment and important in assisting you to maintain a good relationship with the community.
